Shaping a healthier Tomorrow

www.meetimport.com

Caresome

Meet Import was established in the year 2005 and has since grown into one of the leading importers of surgical and medical products in India. Over the years, the company has built a strong reputation for reliability, consistency, and trust within the healthcare industry.

With a well-established distribution network across India, Meet Import supplies a wide range of surgical and medical items to leading hospitals, clinics, and government institutions. Its reach and operational efficiency allow timely availability of products across regions.

The company is committed to offering the latest, high-quality surgical and medical products to dealers and customers. Every product is sourced with a strong focus on quality standards, performance, and clinical reliability to support effective patient care.

By maintaining competitive pricing without compromising on quality, Meet Import ensures greater value for its partners and customers. This customer-first approach, combined with dependable service and continuous product upgrades, gives the company a strong edge over competitors in the medical supply market.

Home Care

Caresome

Devices that offer reliable, easy-to-use medical essentials for everyday health monitoring at home.

Keeps your back cool and dry with breathable, all-season fabric

Designed for long sitting hours at work, driving, or studying

Helps reduce upper, mid, and lower back discomfort during daily use

Adapts to your body over time for personalised comfort and support

Stays securely in place on chairs and car seats without slipping

- Designed to make long sitting hours more comfortable and fatigue-free
- Helps maintain a healthy sitting posture throughout the day
- Reduces pressure buildup in sensitive lower body areas
- Supports natural body alignment while seated
- Enhances everyday comfort at work, home, or while travelling

Leg support pillow

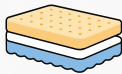

Caresome

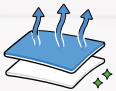

Features

Ergonomic Design

Dual-Layer Foam Construction

Breathable & Hygienic Covers

Adjustability

Stability Features

- Most pillows feature a wedge or contoured shape that follows the natural curve of your legs, providing support for your calves, knees, and thighs.
- Many models combine a supportive, high-density foam base (to prevent sagging) with a softer memory foam top layer for cushioned comfort.
- Pillows typically include a removable machine-washable cover made from breathable or hypoallergenic fabrics to ensure cleanliness and prevent heat buildup.
- Some advanced versions include detachable cushions or modular inserts, allowing you to customize the height & support level to fit your body or recovery needs.
- To prevent shifting while you rest, many pillows come with non-slip bases or silicone grips

Cervical butterfly pillow

Caresome

Features

Ergonomic Butterfly Contour

Dual-Height Design

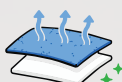

Built-in Armrest Grooves

Hollow Center / Head Cradle

High-Density Memory Foam Core

Breathable, Washable Covers

- The pillow features a unique indented shape with raised side “wings” that cradle the head and support the natural curve of the cervical spine.
- Most models offer two pillow heights, allowing users to choose the side that best suits their body frame and sleeping position.
- The side cutouts provide natural space for the arms and shoulders, helping reduce pressure and numbness while sleeping on the side or stomach.
- The central depression distributes head weight evenly, reduces pressure points, and helps limit excessive head movement during sleep.
- Made from slow-rebound memory foam, the pillow adapts to body heat and pressure while maintaining its shape over time.
- Hypoallergenic, skin-friendly covers with breathable mesh or ventilation channels help improve airflow and reduce heat buildup.

Orthopedic pillow

Caresome

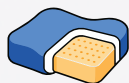

Features

Contoured
Ergonomic Shape

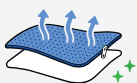

Dual-Height
Support

Therapeutic
Foam Core

Pressure
Point Relief

Breathable,
Removable Covers

- Features a wave-like or depression contour that cradles the head while providing a firm roll or raised edge to support the natural inward curve (lordosis) of the neck.
- Like butterfly or contour pillows, they often feature a higher side and a lower side to accommodate different sleeping postures (back vs. side sleeping) and individual neck lengths.
- Typically constructed with high-density memory foam, latex, or high-resilience polyurethane foam to offer steady support without collapsing under the weight of the head.
- By distributing weight evenly across the head and neck, it minimizes stress on the cervical vertebrae and relaxes the surrounding musculature.
- Fitted with skin-friendly, washable outer covers—often enhanced with moisture-wicking fabrics or mesh panels to ensure airflow throughout the night.

PAIN RELIEF

Caresome

Devices designed to ease muscle tension, reduce discomfort, & support everyday recovery through effective, easy-to-use pain management at home.
